

Multi-gas Infra Red Fourier Transform (FTIR) Analyzer - Model MIR FT

**Continuous
emission monitoring**

**A single analyzer for
the measurement of
multiple gases:**

NO, NO₂, NO_x, N₂O, CO,
CO₂, SO₂, HCl, HF, CH₄,
TOC, NH₃, H₂O, O₂ ...

Main applications:

- Urban waste incinerators
- IHazardous waste incinerators (industrial & hospital)
- Cement plants
- Paper mill
- Glass plants
- Engine exhaust gas
- ...

Exclusive features:

- Especially designed for wet and corrosive sample gases
- Rugged & insensitive to vibrations
- Excellent calibration stability
- Automatic correction of spectral interferences
- Fast and simultaneous measurements
- Unmatched accuracy and reliability
- Windows-based analysis and reporting softwares
- Heated sample line (in association with HOFI or SEC® system according to the application)

MIR FT : CEMS rack cabinet
