

Nitrogen Oxides Analyzer

MEZUS 210

| NOx Analyzer

MEZUS 210 NOx Analyzer is the analyzer that measures minimum amount of NOx(NO,NO₂) in air at the same time using the Chemiluminescence.

O₃ Generator used for MEZUS 210 is designed for strong durability with no failure for a long time and NO₂ →NO Converter for measurement of NO₂ is equipped with high efficient cartridge material which improves the change rate near 100%. All temperature adjustment system such as response cell, Converter, PMT, TEMP etc are designed to be entered in the self software which is easy to use.

All gas analyzers of MEZUS series were equipped with screen interface design using TFT-LCD & Touch screen so that user can operate the analyzer and maximize the visual image, and MCU applied to the analyzer is ARM11 32bit processor and operates based on Linux Kernel 2.6 which maximizes the system stability due to multiprocessing.

In addition, the analyzer is equipped with automatic zero correction system (Auto Zero) for smooth measurement and various interfaces (Ethernet, RS232, RS485, USB, DIO, Analog out) so that user can use it more conveniently and usefully.

| Features

- Ranges 0-0.1 / 0.5 / 1 ppm, user selectable.
- 7inch TFT LCD & touch screen interface.
- Ethernet, RS-232, RS-485 & USB ports.
- USB interface utilizes for System Program Update.
- Temperature & pressure compensation
- Internal zero(optional)
- Stored data can be retrieved RS-232, USB Interface and TCP/IP network
- In built Data Logger Utilizes NAND-Flash to Store up to 5min/1year averaged data
