

Ozone Analyzer

MEZUS 410

| O₃ Analyzer

MEZUS 410 O₃ Analyzer is the analyzer that measures minimum amount of O₃ in air correctly using the UV absorption method. The analyzer is equipped with high performance and high efficiency O₃ Scrubber and used the specimen tube of special coating and materials to remove the obstacle components and prevent the adhesion of specimen for the measurement of minimum amount of ozone.

All gas analyzers of MEZUS series were equipped with screen interface design using TFT-LCD & Touch screen so that user can operate the analyzer and maximize the visual image, and MCU applied to the analyzer is ARM11 32bit processor and operates based on Linux Kernel 2.6 which maximizes the system stability due to multiprocessing.

In addition, the analyzer is equipped with automatic zero correction system (Auto Zero) for smooth measurement and various interfaces (Ethernet, RS232, RS485, USB, DIO, Analog out) so that user can use it more conveniently and usefully.

| Features

- Ranges 0-0.1 / 0.5 / 1 ppm, user selectable.
- 7inch TFT LCD & touch screen interface.
- Ethernet, RS-232, RS-485 & USB ports.
- USB interface utilizes for System Program Update.
- Temperature & pressure compensation
- Internal zero(optional)
- Stored data can be retrieved RS-232, USB Interface and TCP/IP network
- In built Data Logger Utilizes NAND-Flash to Store up to 5min/1year averaged data
