

Multigas Calibrator & Zero Air Generator

MEZUS 510/520

| Multigas Calibrator & Zero Air Generator

Calibrator/ Zero Air Generator uses flux mixture method and GPT(Gas Phase Titration) method in which flux of pure ingredient gas and diluted gas are changed and mixed so that standard gas with desired concentration by dilution is supplied.

And, O₃ Photo Cell is installed to calibrate O₃ analyzer with accuracy and reproducibility by giving a feed-back of produced O₃ concentration.

| Features

■ MEZUS 510

- UV Photometer (Range 0 - 0.1 to 0- 1 ppm)
- Optional O₃ Generator Module
- 7inch TFT LCD touch screen interface.
- Ethernet, RS-232, RS-485 & USB ports.
- Temperature & pressure compensation
- Stored data can be retrieved RS-232, USB Interface and TCP/IP network

■ MEZUS 520

- Internal Membrane Air Dryer (Dewpoint - 20°C up to 20 LPM)
- Internal Pump (Output 20 SLPM @ 30 psig)
- Automatic Pump Control
- Automatic Water drain
- Scrubber for SO₂, NO, NO₂, O₃, H₂S and NH₃
- Scrubber for Hydrocarbon (Options)
