

Ozone Standard Reference Photometer

KN 400

| O₃ SRP

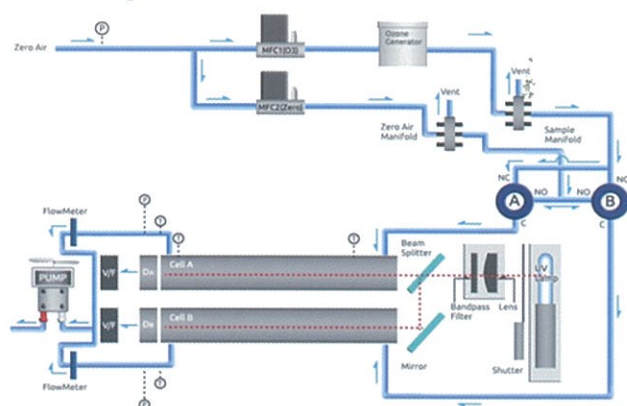

KN 400 O₃ SRP(Standard Reference Photometer) is the analyzer that measures minimum amount of O₃ in air correctly using the UV absorption method.

O₃ SRP design is based on US-EPA standard.

It can use for O₃ analyzer and O₃ generator calibration.

That operated by dual optical cell link with controller.

Controller is linked with PC(application), so easy to analyze data and monitoring status.

| Features

- UV Photometer (Range 0 - 1,000 ppb)
- Measurement mode
 - Internal O₃ Generator Mode
 - External O₃ Analyzer Mode
- Compensation of pressure and temperature Parameter (precise calibration)
- Precision Control and Measurement of O₃ Generator and Zero Air by MFC
- Data transmission based on RS-232
- Provide windows application for signal processing and monitoring
