

LDV Measurements

I am interested in the following services:

- ☐ Individual consultancy for optimal configuration for my LDV measuring unit
- ☒ Demonstration of ILA-equipment for my measurement
- ☐ Offer without obligation for the described measurement
- ☐ Service measurement
- ☐ Calibration of an existing measurement device

Please fill in the following questions as completely as possible:

Range of flow velocity

.....0,2 - 3..... m/s

Focal length needed (space between optic and measuring volume)

.....

In which medium do you want to measure?

- ☒ Gas
- ☐ Water
- ☐ Other

Focal length of additional lenses

.....

Transparency of medium

- ☐ Yes
- ☒ No

Backwards flow detection needed?

- ☐ Yes (shifted)
- ☒ No (unshifted)

Application (detailed description, add photos of measurement setup if possible)

measure fluid flow velocity, at the point A,B,C

 in the file I've been already attached.

Number of velocity components to be measured

3 components included the Velocity of particles, air

 and check the flow characteristics in the homogenizer
 - pls check my attached file.

Geometry (tube, flowed body, etc.)

...Tube, cylinder.....

Traversing system needed? (Traversing/ length of traverse path/ number of axes)

0,164 m

Optical access already available

- ☐ Yes
☐ No

Seeding (particle, generator) necessary?

- ☒ Yes
☐ No

Window chamber necessary?

- ☐ Yes
☒ No

Precision requirement (maximum permissible errors/ traceability)

.....

.....

Compatibility to existing components (Laser, PC, Controller..)

.....

.....

Special requirements to measuring stability

.....

.....

Synchronized detection of other 4-20 mA signals (pressure/ temperature)

.....

.....

Flexibility e.g. of the application

.....

.....

Other details of the application

.....

.....

Certificate of measuring accuracy needed?

- ☐ Yes
☒ No

Ray tracing software necessary?

- ☐ Yes
☐ No

I don't know it is for what ?

Software customization necessary?

- ☐ Yes
☒ No

Voltage 230V?

- ☒ Yes
☐ No

Preferred delivery date

.....
