Frequency of Calib	Calibration Policy
Annual	Meter is calibrated on 12 month cycle.
CPTU	Calibrate Prior To use: Meter not kept in state of calibration. Requires advanced notice.
nn x year	Meter is calibrated on nn year frequency as based on manufacturer recommendations.
Qual	Qualitative: Use for qualitative measurements (i.e. compliance with occupational exposure limits is not being measured).
Backup during Calib	
Multi	Multiple meters are maintained in calibrated state. Staggered calibration schedules of meters ensure one is on-site. At least one other is available in periods marked orange .
Rental	One Meter is maintained in calibrated state. A back-up is rented during periods of repair or calibration.
Single	One Meter is maintained in calibrated state. It is not backed-up during periods of repair or calibration. Call for availability. Will not be available at least during period in Red .
