

Magnetic Flow Meter

Introduce

Magnetic flowmeter is applicable for all conductive liquids. Typical applications are monitoring accurate measurements in liquid, metering and custody transfer. Can display both instantaneous and cumulative flow, and supports analog output, communication output and relay control functions.

Technical Specifications

Specification	Detail information
Accuracy	$\pm 0.5\%$ of the measured value
T _{response}	≤ 3 minutes
Measuring medium	Water
Display	Monochrome LCD
Power supply	100 - 220VAC, 50/60Hz, max 10W
Output	Analog output: 4 - 20mA, or RS485
Pipe size	DN150
Electrode	316
Installation	Flange

MAGCEM
