

Features (DX4000 VS testo 350)

	DX4000	testo 350
Technology	FTIR	Electro-chemical sensor/ NDIR for CO ₂
Sampling technique	Hot extractive	Cold extractive – condensate trap (thermoelectric chiller)
Baseline calibration	N ₂ gas (stable)	Ambient air (unstable)
Standard gas calibration	No	Monthly / Quarterly (each gas)
Dilution for higher gas range	No	Yes, with ambient air (unstable)
Number of detected gas (simultaneously)	Max. of 50 gases	Max. of 6 sensors (8 gases)
Cross interference correction	Yes	No
Gas expandability	Yes Switch the gas library in software	No, fixed
Type of gases available	406 gases, flexible range	10 gases only, fixed range
H ₂ O and O ₂ compensation	Yes	O ₂ only
Power drive	110/ 230VAC	DC battery (11 ... 40VDC) or 110/ 230VAC
