Accuracy of testo 350 Emission Analyser

Dear Sir or Madam,

we herewith confirm, that the testo 350 Emission Analyser is fulfilling the in Vietnam standard specified accuracy for emission testing equipment, that is approved for inspection.

When the testo 350 Emission Analyser is calibrated according ASTM D-6522 Standard and used under laboratory condition, an accuracy < 5% is achieved over the entire measuring range.

Please feel free to update your local marketing material accordingly with the above statement.

Best regards from Titisee/ Germany
