

M9096 Mini Stack Train: Isokinetic Sampler

In-Stack Manual Method Particulate Sampler for ISO9096, EN13284-1, US EPA Method 17.

Lightweight construction with case suitable for easy transportation.

Modular Sample Probe & Pitot Assembly enables user to extend or shorten for larger and smaller stacks/ducts.

Unique Sample Gas Flow Controller that maintains the flow at the set value, compensating for Filter Paper loading.

Pump, Dry Gas Meter, Flow Controller & Flowmeter built into Case.

Ideal for Limited Access Sampling or Initial Site Survey.

Specification:

1.2M Modular Probe & Pitot Assembly
25mm Filter Holder & Selection of ISO/EN Nozzles
Flow rate: 0-12lpm
Flow Calculation Software (Spreadsheet)
Weight: 17Kg (Complete)
110V/220V/12Vdc

Port Seal Adapter for use with Probe Sheath

ISO9096 & EN13284-1 High & Low Dust Standards with validated Filter Holders & Nozzles

OPTIONS:

Westech Profile Velocity Data Logger
Filter & Nozzle Kits
External Pump
Additional Probe & Pitot Components
Port Seal Adapters & Probe Sheaths
Sampling Software (Spreadsheets)
'Stack Calculator'
Calibration (In-House & UKAS)
12Vdc
220V
Special Manufacture Items
Mini Gas Train for Vapour Phase & Side Stream Sampling
Digital Temperature Controller/Reader built into Sample Case
Service, Maintenance & Training
